

Standard to IPC Lookup Table

Publish Date: May 29, 2012

Overview

The following table is a lookup guide between industry-standard package naming and the IPC-7351 naming convention as used in Ultiboard.

Ultiboard 11 introduces over 1500 new IPC-compliant surface mount technology (SMT) land patterns, which conform to all aspects of the IPC-7351 Generic Requirements for Surface Mount Design and Land Pattern Standard, including the naming convention. The following table is provided as a means to map standard JEDEC package dimensions to the corresponding IPC-7351 equivalents.

To read more about the new land patterns added in Ultiboard 11.0.1, consult the article [Prototype Faster with Over 1500 New Land Patterns in Ultiboard 11.0.1](http://zone.ni.com/devzone/cda/tut/p/id/12014). (<http://zone.ni.com/devzone/cda/tut/p/id/12014>)

Table of Contents

1. IPC-Naming Convention
2. JEDEC to IPC Lookup Table
3. EIA-to-IPC Lookup Table

1. IPC-Naming Convention

Beginning in Ultiboard 10, all new land patterns follow the IPC-7351 Naming Convention (landpatterns.ipc.org/IPC-7351Table3-15September2005.pdf) as outlined by the IPC-7351 Generic Requirements for Surface Mount Design and Land Pattern Standard. For example, a small-outline integrated circuit (SOIC) package would follow the following format:

SOIC127P + Lead Span Nominal **X** Height - Pin Qty

2. JEDEC to IPC Lookup Table

The following is a lookup table between JEDEC packages and the IPC equivalent within the Ultiboard database. Note: Package and land pattern dimensions should be verified before use. For package dimensions, consult the free PCB Matrix Land Pattern Viewer (SMN7351B library) which contain package data for all land patterns outlined in this article
